Barracuda SecureEdge

Secure your users, sites, and things with one easy-to-deploy cloud-first platform that connects any device, app, and any cloud/hybrid environment.

Licensing Overview & Examples

## Licensing overview

Licensing Examples

Licensing overview

Components and types of deployment

SecureEdge Manager

This cloud-based management user interface is activated with the first SecureEdge order and is free-of-charge. It enables central management of all Barracuda SecureEdge components in an organization's network.

SecureEdge Site Device

This on-premises component of SecureEdge can be run as hardware or virtual appliance - available in several different model specifications.

A SecureEdge site device can act as a standalone Firewall, SD-WAN device, Secure Web Gateway, ZTNA device, or Cloud-On ramp device to a SecureEdge Service - or a combination of any of these. Site devices can easily be configured to provide private Edge Services at no additional charge.

Please note that —as for all Barracuda products— an active Energize Updates subscription is mandatory for every site device (hardware or virtual).

For detailed hardware specifications, please see SecureEdge Specifications.

SecureEdge Access Agent

The SecureEdge Access Agent provides DNS-based URL filtering, Secure Internet Access (SIA), and secure Zero Trust Access (ZTNA) to any public cloud, private or SaaS application.

The SecureEdge Access Agent is available for all desktop and mobile platforms. Licensing is user-based and covers up to 10 devices per user (also for simultaneous use).

The minimum initial order quantity for SecureEdge Access Agent seats is 25. SecureEdge Access Agent seats include Edge Service provided by Barracuda Networks that allows

for remote filtering and remote ZTNA-based application access with multiple browser tabs or virtual desktops. Additional service bandwidth is available for purchase.

SecureEdge Services

Edge Services act as the central hub in your network, both for SD-WAN and ZTNA. To fit the needs of an organization best, there are three variants to choose from:

- **Edge Service**: The Software-as-a-Service approach is deployed via a fully managed SaaS service, provisioned by Barracuda Networks and licensed in 50 Mbit increments up to 1 Gbit.
- **Edge Service for Virtual WAN**: In an Azure-integrated deployment, this component is deployed and billed through Azure Marketplace, with the workload running inside the organization's Microsoft Virtual WAN service. From a performance-based point of view, the license is available for a variety of scale units (from 2-80) with aggregated bandwidths between 1 and 40 Gbps.
- **Private Edge Service**: For a private deployment or on-premises deployment of the Edge Service, a SecureEdge site device can be promoted to be a Private Edge Service. A site device (either hardware or virtual) with a valid Energize Updates subscription is required for such a setup.

SecureEdge Connector software

Enables ZTNA access to any application in any public cloud or site. SecureEdge Connector software replaces the requirement to establish routing or deploy an additional appliance or cloud image. The Connector is a small software agent, managed by the SecureEdge Manager, for Linux or Windows servers that is deployed with one or multiple of the target applications and is available in two different editions:

- **Connector for inbound traffic**: free of charge and allows for one-directional communication.
- **Connector for routed traffic**: requires seperate licensing and allows for bi-directional communication (e.g., between servers, or apps).

Secure Connector IoT device

For IoT environments, Barracuda provides purpose-built connectivity appliances with minimal footprint and DIN-rail compatibility. For harsh environment, rugged hardware models are available.

Usage of Secure Connector devices requires a valid service subscription for the numbers of devices in use.

For detailed hardware specifications, please see SecureEdge Specifications.

Energize Updates (EU)

Barracuda Energize Updates help you secure your investment in the ever-changing IT world. Benefit from security updates to patch or repair any security vulnerabilities, keep your Barracuda product up-to-date and fully functional at all times, and get access to our award-winning support.

An active EU subscription is mandatory for all SecureEdge hardware and virtual models. Available on a monthly basis or as SaaS.

On top of the standard benefits of Energize Updates, it also covers for SecureEdge site devices Txx and VTxx:
- SD-WAN
- Firewall and Application Control
- Web Filter
- IPS
- Deep TLS/SSL Inspection
- Malware Protection with Advanced Threat Protection

License expiration behaviour
If the mandatory subscription **Energize Updates** expires, following functional restrictions apply:

Standalone units:
Units remain accessible via SecureEdge Manager but no configuration changes will be accepted. Traffic will keep flowing through the device. Basic firewall functionality will keep working. Locally stored security functions like IPS with IPS signatures stored locally will keep working but receiving no more updates and, thus, be outdated quickly. Security functions relying on active cloud services provided by Barracuda Networks, like Advanced Threat Protection and URL filtering, will stop to function.

Units connected to a SecureEdge Service via SD-WAN or units configured as a Private Service Edge: Additionally to above, the SD-WAN tunnels will terminate and all ZTNA connections, point-to-site tunnels and Connector tunnels will terminate.

Instant Replacement (IR)

One hundred percent uptime is important in corporate environments, but sometimes equipment can fail. In the rare case that a Barracuda product fails, Barracuda ships a replacement unit on the same or next business day. And by means of the Hardware Refresh Program, we ensure that customers benefit from the latest hardware improvements and firmware capabilities:

• Enhanced support providing phone and email support 24/7

• Free hardware refresh after four years of continuous IR coverage.

For more details on IR, please refer to the Instant Replacement website.

> Must be purchased within 60 days of hardware purchase and is a continuous subscription from date of activation.

> For hardware units purchased prior to March 2024, Warranty Extension (WE) was part of EU (optional for Secure Connector 2 and Secure Connector 3 models) and available on initial purchase.
>
> For hardware units purchased from March 2024 onwards, IR optionally covers extended warranty and other hardware lifecycle aspects as defined on the Instant Replacement website.

Premium Support (PS)

Premium Support ensures that an organization's network is running at its peak performance by providing the highest level of 24/7 technical support for mission-critical environments. A dedicated Premium Support Account Manager and a team of technical engineers provide fast solutions to high-priority support issues, thereby ensuring that Barracuda Networks equipment maintains continuous uptime.
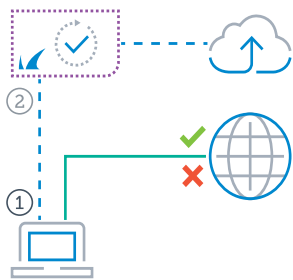

For more details on PS, please refer to the Support Services website.

> Premium Support is available as part of the SaaS offering.

---

1 – Energize Updates subscription is included with monthly Connector Service subscription.
2 – Requires a valid Edge Service subscription or validly licensed site device.

Licensing Examples

Secure Internet Access (SIA) for mobile users

Today, many employees work fluidly between corporate offices, branch offices, home offices, and on the road. And yet the level of corporate security policies, for example, for acceptable web access, needs to be the same. Powered by the vast Barracuda Threat Intelligence Network and an A.I.-derived security intelligence, the SecureEdge Access Agent extends security and policy compliance to any device on any platform.
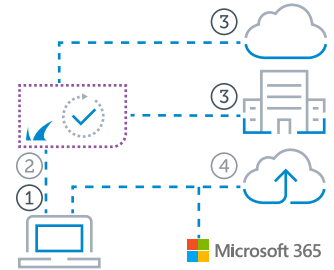

Required components - Details see table below:

① SecureEdge Access Agent, one seat per user; includes Secure Edge Service.

② [optional] Additional Edge Service bandwidth

#	Description	Product Code	Quantity	Duration	via	Comment
①	Barracuda SecureEdge Platform, Access, per user, 1M	SEP-SEACCESS-Usr-1M	One seat per named user, up to 10 simultaneous devices per user	Initial order minimum: 12 months	Barracuda/ Channel	Seat for SecureEdge Agent INCLUDING Edge Service bandwidth.
②	[optional] Barracuda SecureEdge Platform, Edge Service, 50Mbps, 1M	SEP-ES-50MBPS-1M	As required. *Note: Can easily be upgraded or downgraded on-the-fly.*	Initial order minimum: 12 months	Barracuda/ Channel	**SaaS**: Edge Service delivered as SaaS service by Barracuda Networks (recommended for up to 1 Gbps or max. 1,000 users). or, alternatively, **Self hosting**: Any SecureEdge site device (hardware appliance Txxx or virtual appliance VTxxx) with valid EU subscription configured as Private Edge Service. or, alternatively, **Microsoft Azure**: Edge Service hosted and provided by Microsoft Azure utilizing Azure Virtual WAN is available here (for up to 40 Gbps or 20,000 users)

Secure access to private and SaaS apps (ZTNA)

Provide direct, secure access to all sanctioned applications with continuous security and eligibility valuation, no matter where the apps are hosted and for any user on any device. Optimize last-mile network traffic to make the best use of shared internet uplinks.

Required components - Details see table below:

① SecureEdge Access Agent, one seat per user

② [optional] Additional Edge Service bandwidth

③ SecureEdge Connector for inbound communication, free of charge, to facilitate one-directional access to non-public cloud apps and private apps on site

④ [optional] SecureEdge Connector for routed (bi-directional) communication between servers, apps, etc.

Note:
Central management via SecureEdge Manager is always included and free of charge.

#	Description	Product Code	Quantity	Duration	via	Comment
①	Barracuda SecureEdge Platform, Access, per user, 1M	SEP-SEACCESS-Usr-1M	One seat per named user, up to 10 simultaneous devices per user	Initial order minimum: 12 months	Barracuda/ Channel	Seat for SecureEdge Agent INCLUDING Edge Service bandwidth.
②	[optional] Barracuda SecureEdge Platform, Edge Service, 50Mbps, 1M	SEP-ES-50MBPS-1M	As required. *Note:* *Can easily be upgraded or downgraded on-the-fly.*	Initial order minimum: 12 months	Barracuda/ Channel	**SaaS**: Edge Service delivered as SaaS service by Barracuda Networks (recommended for up to 1 Gbps or max. 1,000 users). or, alternatively, **Self hosting**: Any SecureEdge site device (hardware appliance Txxx or virtual appliance VTxxx) with valid EU subscription configured as Private Edge Service. or, alternatively, **Microsoft Azure**: Edge Service hosted and provided by Microsoft Azure utilizing Azure Virtual WAN is available here (for up to 40 Gbps or 20,000 users).
③	Connector (inbound)	[non-charge item]	No limit to how many SecureEdge connectors may be deployed per customer. *Note:* *Downloadable directly from within SecureEdge Manager.*	n/a	SecureEdge Manager	The inbound connector is an easy-to-deploy software agent for establishing secure inbound connections between the Edge Service and sites where resources need to be accessed and no SecureEdge site device is available. For details, please see Barracuda Campus.
④	[optional] Connector (routed)	SEP-SCON-Unit-1M	One per (routed) connector. *Note:* *Downloadable directly from within SecureEdge Manager.*	Initial order minimum: 12 months	SecureEdge Manager	The routed connector is an easy-to-deploy software agent for establishing bi-directional communication between servers, apps, IoT hardware. It can also be used for NVA replacement. For details, please see Barracuda Campus.

Secure Web Gateway (SWG) for office and branch edges

SecureEdge site devices protect the office edge and any device in the office from internet-borne malware, spyware, and other unwanted content. In addition to malicious-code detection, this includes URL filtering and application control for thousands of popular applications (even ones that are not web based). Enforcement can be done either on the device or in the Edge Service layer.
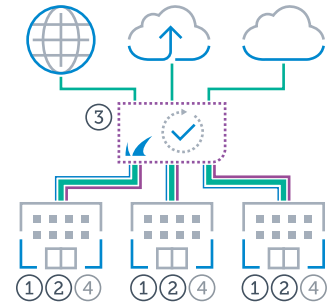

Required components - Details see table below:

① SecureEdge site device(s), one per location, two per location if high-availability is required

② Energize Updates subscription for site devices (per device)

③ [optional] Instant Replacement for site devices (per device)

Note:
Central management via SecureEdge Manager
is always included and free of charge.

#	Description	Product Code	Quantity	Duration	via	Comment
①	Barracuda SecureEdge T200 site device	CGW-T200C	One per remote location, two if the location shall be high-availability	n/a	Barracuda/ Channel	Example given for a T200C hardware appliance for a site with max. 300 users and max. 1.5 Gbps threat protection throughput. *Note: Site devices are also available as virtual appliances.*
②	Barracuda SecureEdge T200 1 month Energize Updates subscription	CGW-T200-EU-1M	One per site device, two if the location shall be high-availability.	Initial order minimum: 12 months	Barracuda/ Channel	Example given for a Energize Updates appliance subscription for SecureEdge T200 site device in the BYOL licensing scheme. *Note: Site devices can also be operated on a PAYG/SaaS licensing scheme.*
③	[optional] Barracuda T200 1 month Instant Replacement subscription	CGW-T200-IR-1M	One per site device	n/a	Barracuda/ Channel	Instant Replacement subscription provides an extended warranty, and shipment of a replacement unit on the same day or next business day (best effort) with express mail upon notification.

Cloud-delivered office connectivity and security

Securely connect any branch office to the cloud and ensure it is protected against internet-borne threats like malware, ransomware, and spyware. Secure SD-WAN provides the on-ramp to the cloud for optimal application performance.
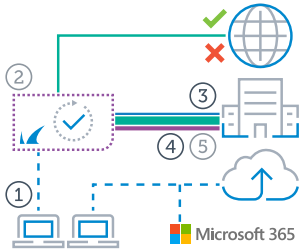

Required components - Details see table below:

① SecureEdge site device(s), one per location, two per location if high-availability is required

② Energize Updates subscription for site devices (per device)

③ SecureEdge Service, for site devices to connect to

④ [optional] Instant Replacement for site devices (per device)

Note:
Central management via SecureEdge Manager is always included and free of charge.

Firewall-as-a-Service (FWaaS)

Provide cloud-delivered, next-generation security, secure internet access, and application control to any remote user on any device.

Required components - Details see table below:

① SecureEdge Access Agent, one seat per user

② [optional] Additional Edge Service bandwidth

③ SecureEdge site device(s), one per location, two per location if high-availability is required

④ Energize Updates subscription for site devices (per device)

⑤ [optional] Instant Replacement for site devices (per device)

Note:
Central management via SecureEdge Manager
is always included and free of charge.

Security and connectivity for "things" (IoT/ICS)

Easily and quickly connect almost any IoT device or heavy machinery on the factory floor to the cloud of your choice or the office you need. Provide the security you need centrally.

Required components - Details see table below:

① SecureEdge Service for Secure Connectors to connect to

② Secure Connector: Small IOT connectivity appliance

③ Service subscription for Secure Connectors that includes Energize Updates subscription

④ [optional] External Power Supply for Secure Connector if PoE or an industrial power plug is not available at the final location

⑤ [optional] Instant Replacement for Secure Connector devices (per device)

> Note:
> Central management via SecureEdge Manager is always included and free of charge.

#	Description	Product Code	Quantity	Duration	via	Comment
