vSOCBox™

A unified, **AI/ML-powered SOC in a Box** delivers smart, real-time threat detection and remediation.

- Discover the platform that secures and insures.
- Consolidate point solutions in a box.
- Automated AI-enabled MDR.
- Reduce costs. Stop the breach for all layers.

Risk & Compliance · **ASM** · **Vulnerability** · **Apps** · **Cloud** · **Attacks** · **End User** · **IoT/OT** · **Threats** · **Network** · **Performance** · **Secops** · **MDR**

Empowering You with
Multilayered Protection

How it works

Client Infrastructure

Client Assets
- Endpoint Devices
- Networking Devices
- Security Devices
- Cloud / Applications / DBs Etc.
- IoT/OT Devices

Any type of Log inject

Remediation

Incident Reporting

Weekly and Monthly Reports

Access to vSOCBox Application

vSOCBox
- Standardization
- Categorization
- Entity Behavior Analytics
- AI/ML Driven Security Alert Analysis
- AI Based MDR
- AI-Powered Incident Reporting
- AI Agent Enabled Threat Remediation
- Log Archiving

Virtual Instance

Secure VPN Tunnel

vSOCBox Cloud

Threat Intelligence
- Correlation Rule
- Threat Intel
- Threat Hunting
- Threat Triage

Dashboard Manager
- Assets And License Management
- Security And Risk Dashboards
- Compliance And Gap Reports

L2 & L3 Team

Technology USP:

- Any type of logs injection
- Near to Zero Mean time to response
- Real time detection of threats for all layers
- AI based false positive reduction to save IT team efforts
- Unified Risk and Compliance Dashboards
- Remediation to defend attack in real time

Business USP:

- ☑ No ESP based License to cover all events for monitoring
- ☑ Multi Products in Single Box to save cost
- ☑ Automated 24*7 L1 to reduce cost and increase SLA.
- ☑ Higher Return of investment
- ☑ Assets based License to cover all events for monitoring
